

Here below you can find a short tutorial about the submission of the camera ready papers through the EasyChair system.

1. Log in to the [EasyChair page of the conference](#) with the account you have registered. Then you should see on the top of the page that you have logged in as an author:

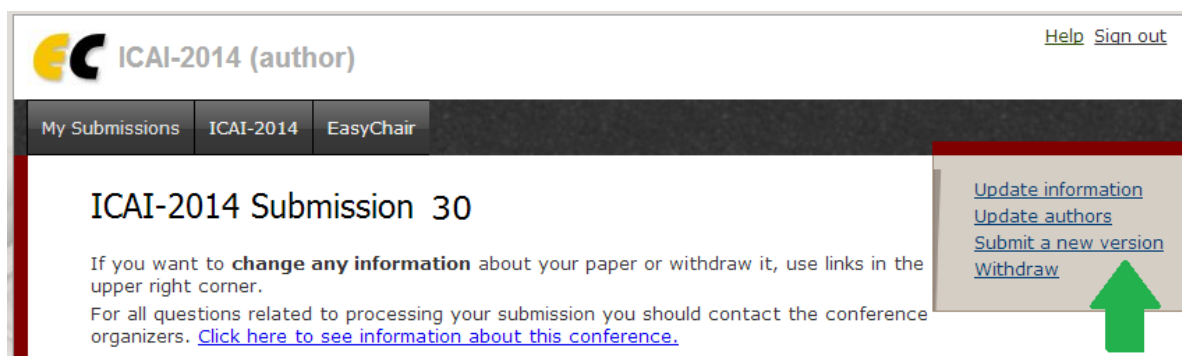

(If you see a different role between the parentheses, change your role in the “ICAI 2014” menu by choosing “Change role” option.)

2. Choose your previous submission (it contains yet only your abstract) from “My Submissions” menu.

3. Then click on “Submit new version” in the upper right corner of the page.

- Put the editable source version (TeX file with figures or a MS Word document) *and* the finalized PDF version of your manuscript into a compressed zip folder. Then click “Choose file”, browse your zip format file, then click on the “Submit a new version” button. (Using MS Word you can save your document in PDF format too. You can find sample files for both source versions on the page of the conference.)
